To provide more equipment coverage on the shallow water dredging. We have designed & delivered 1 unit of sectional barge to our Singapore customer in the middle of October. The sectional barge is used to transport the dredge material.

We received the repeat order (3 sectional barge) to supply another unit early this month.

Project Site: Bukit Panjang, Singapore.

Specification: 2 sections with 50m storage capacity

Benefits of sectional barge:

- 1) Modular & interlocking with additional sectional barge
- 2) Designed to be containerized & truckable.
- 3) Custom made according to customer requirement.

Application:

- 1) Barge transporter for shallow water dredging (lake, reservoir & inland river)
- 2) Floating platform
- 3) Excavator, cranes & bridge construction machinery working platform.
